- Kigali, Rwanda

EDUCATION

- AFRICAN LEADERSHIP UNIVERSITY**
January 2023 - Present
Bachelor's degree in Software Engineering
- SoS TECHNICAL HIGH SCHOOL**
January 2018 - 2021
Software development

TECHNICAL SKILLS

- HTML/CSS/SCSS
- Javascript
- Tailwind
- Bootstrap
- SQL
- Nextjs
- React Native

SOFT SKILLS

- Problem solving
- Adaptability
- Communication
- Creativity
- Collaboration
- Teamwork
- Time management

CERTIFICATES

- SheCanCode Bootcamp --Certificate of achievement
- Rwanda Coding Academy - Future Skills Bootcamp
- I am Science Certificate -- Coding Skills

PROFILE

A motivated software engineering student with hands-on experience implementing and supporting user-centered web and mobile applications. Passionate about delivering reliable systems, training users, and improving product quality through testing and collaboration.

WORK EXPERIENCE

Trainee and Frontend Intern

Sept 2024 - April 2025

Comprehensive Staffing Resources

- Building responsive websites with Next.js and SCSS
- Provided frontend support and bug fixes on JobMatch — a platform connecting talents with employers
- Currently working on Huza Apartment — a project for house renting
- Gained different soft skills including communication, teamwork, leadership, and time management, helping me work effectively with a team.

Frontend Intern

Sept 2024 - January 2025

Umurava

- Built real-world projects using Next.js and Tailwind CSS
- Worked with Figma designs, enhancing UI/UX skills
- Contributed to Umurava ATS project improving its functionality

Mobile trainee

March 2024- August 2024

SheCanCode Bootcamp

- During my mobile app bootcamp, I explored various technologies for mobile app development, including frameworks like React Native and tools such as Firebase for backend services.
- Provided frontend support and bug fixes to KidsCare app, designed to help parents locate nearby kindergartens where they can safely leave their children while they go to work with peace of mind.

Frontend trainee

Oct 2023- March 2024

- Gained experience with React.js, Node.js, and Tailwind CSS for front-end development by developing SheCanCode Inventory Management System
- Engaged in user-centered development by first understanding client needs, troubleshooting issues, and training users.
- Participated in multiple team-based capstone projects focused on creating real-world solutions for the community.

Trainee

May 2021- Sept 2021

Technnovation Girls

- During the virtual fellowship, we worked as a team to design and implement the mobile app called No-queue app for 2021 technnovation Grils season using app inventor
- Aimed to minimize queues in government offices, banks, and service centers
- Our goal was to reduce waiting times, which would enhance staff productivity and improve the overall customer experience

Software Development Internship

August 2019 - December 2019

Awesomity Lab

- Gained insight into the Software Development Life Cycle (SDLC)
- Trained in Bootstrap for creating responsive, visually appealing UIs
- Learned PHP for backend development and database interaction
