Hiring Manager
ADFinance
Kigali, Rwanda

Dear Hiring Manager,

I am writing to express my interest in the Implementation and Support Officer position at ADFinance. As a Software Engineering student at the African Leadership University with practical experience through multiple internships and bootcamps, I am confident in my ability to contribute to your mission of delivering high-quality software systems to financial institutions.

Through hands-on experience with platforms such as JobMatch, Huza Apartment, and Umurava ATS, I have been actively involved in user-centered development—gathering user requirements, resolving issues, and supporting system improvements. I collaborated closely with cross-functional teams to deliver responsive web applications using Next.js, React, Tailwind CSS, and SCSS. At SheCanCode, I also helped build an inventory management system, providing user support and contributing to testing and training.

In addition to my frontend experience, I am familiar with SQL and basic database management, and I bring a strong foundation in troubleshooting, root cause analysis, and incident handling from my development background. My adaptability, communication skills, and teamwork mindset enable me to work efficiently with clients and technical teams alike.

I am excited about the opportunity to grow within a company like ADFinance and contribute to the implementation and support of impactful banking systems. Thank you for considering my application. I look forward to the opportunity to further discuss how my skills and enthusiasm can benefit your team.

Warm regards,
Divine Ishimwe Birasa
